

I'm a full-stack software engineer and a second-year Master's student in Computer and Communication Engineering. I'm passionate about building smart, user-friendly web applications and enjoy working on both frontend and backend. My focus is on creating smooth user experiences, writing clean scalable code, and continuously learning the latest technologies.

Work Experience

Full Stack Web Developer Intern Development Team, Remote	Hirlytics Beirut, Lebanon	Feb 2025 - Present
<ul style="list-style-type: none">Developed and deployed a fully functional company website using React (TSX), PHP, and MySQL, providing a responsive and user-friendly interface.Designed and implemented RESTful APIs to support dynamic front-end features and ensure seamless data integration.Optimized database queries and back-end logic, reducing load times and improving overall application performance.Collaborated with cross-functional teams to align web features with business requirements and enhance user experience.
